## • About Company

Avan Teb Company has started its activities since 1990 using modern technology and implementing quality management standards ISO 9001 and ISO 13485, obtaining national and international approvals including manufacturing license from Medical Equipment Directorate of Iran and the European CE mark. Employing over 100 personnel, 4000 meters of construction, 2 cleanroom spaces, 3 production lines of electrosurgical devices, high-tech electrosurgical accessories, and sterile packs of operating rooms and exporting to more than 10 countries, Avan Teb is the largest medical equipment factory in this field in Iran. Avan Teb owes its ever-increasing success to the up-to-date knowledge, commitment and professionalism of its employees. We aim, as a pioneer in the production and development of modern medical technologies, to manufacture and support products that provide innovative solutions which make doctors and surgeons more effective in improving the quality of treatment for patients around the world.

Avisa800/Avisa1200/Avisa1600

-Portable R.O. Water Treatment Machine: Avisa100

### About company

Arya Teb Firouz Knowledge-Based Company (ATF Co.) established its place as the Ninth Hemodialysis Machine Manufacturer in the world by achieving Technical knowledge and Operating Software of the Hemodialysis Machine in 2015; and placing Iran as the Fifth Country in the world, in this industry. Presently, 500 of ATF machines are installed and operating throughout Iran and ATF has planned to produce 3000 more machines by the end of year 2021.

ATF products are not limited to Hemodialysis Machine, ATF1022. After entering the field of dialysis machines production, ATF took advantage of its capable R&D section to develop, design and manufacture other equipment used in dialysis clinics, leading to the production of portable and fixed reverse osmosis water treatment machines for use alongside the dialysis beds and also for fixed central installation in the dialysis clinics.

Having experience of the first shipment of ATF1022- Hemodialysis Machines to Afghanistan, the company planned for future expansion, by offering products and capabilities to other international markets and clients.

### Company

## Gohar Shafa

Managing director

Mr. Ahmad Saki

Production

Double-J stents, Chest Tube, Ureteral Catheter, High Pressure contrast injection line, I.V Administration set, Guide wire, Amplatz Sheath, Chiba Needle

### About company

Gohar Shafa is a professional and one of the very few specialized medical device manufacturers in Iran & the Middle East. The company was founded in 1995, as a private joint share entity, headquartered in Tehran with its operational site in Khorramabad, Lorestan province.

To fulfill its mission, vision and contributing to all people's health, the company started to produce medical devices since its establishment. The products are used in a very large range of surgical fields such as cardiology, open heart surgery, urology, and oncology.

Very high quality and fair pricing are among the most important reasons many public and private hospitals in Iran, are willing to use Gohar Shafa's products rather than similar products made by other Brands.

We are ready to cooperate with governmental(public) hospitals, privat hospitals, and health care centers overseas.

### About company

ICD Group is an experienced complex of specialized companies in dialysis industry which are proficient in a variety of fields including the production and supply of dialysis products and equipment as well as the provision of specialty services. By adopting the approach to the provision of requirements and services in a unite complex, ICD Group would be capable to organize and standardize product supplementation and distribution, and dialysis services in the country. The idea of establishing the consortium was posed in 2010. The first member and the founder of ICD Group who also initiated the production of dialysers was Meditechsys company. By the gradual development of both facilities and capabilities, some other companies were also established and the consortium's field of activities was expanded. Today, having united policy, ICD Group picks up pace for more immense achievements.
