IRANIAN SYNDICATE OF MEDICAL EQUIPMENT EXPORTERS

Iranian Syndicate of Medical
Equipment Exporters

IRANIAN SYNDICATE OF MEDICAL EQUIPMENT EXPORTERS

Iranian Syndicate of Medical Equipment Exporters was established in 2010. Members are all reputed companies which enjoy satisfying a significant percentage of the local market requirements. their distinct position has been gained through years of supplying the market with high quality products and offering excellent after sales service. The member companies are also very active in exporting their products to many countries.

The Syndicate was created with the aim of joining and coordinating these efforts, thereby ensuring that international customers receive the best products and services. It is sought that Syndicate logo be recognized as a seal of product and Service quality.

While having international quality certificates is a prerequisite for joining, the Syndicate services to provide guidelines and encourage the members to move even beyond customary standards. Products manufactured by the member companies cover a wide range of different medical equipment. Therefore the Syndicate is able to offer a one stop shop solution to most hospitals, clinics and other health care establishments. The Syndicate plans to achieve this goal by consolidating representation and have single strong agent for all member companies.

NOTHING WAY TO BREATHE...

POOYANDEGAN RAH
SAADAT

10

Saadat main field of activity is designing and manufacturing patient monitors (display size: 5 to 18.5 inches), central system, ICU ventilator, electrocardiograph, BFA (brain function assessment) module. Saadat is committed to provide safe and effective patient care solutions through its high quality products.

**POOYANDEGAN RAH
SAADAT CO.**

THE INTRODUCTION OF POOYANDEGAN RAH SAADAT WE MONITOR LIFE

Pooyandegan Rah Saadat Co was found in 1998 by getting support from a research institute, Jouyandegan Rah Saadat.

PATIENT CARE MONITOR

11

Our simple, safe and smart design provides more natural ventilation that may help clinicians improve patient comfort.

Saadat ventilator possesses some extra advantages: NIV, Sigh, Apnea, modern pressure and flow trigger. These features allow making the ventilation even more precise and effective. The new Saadat ventilator helps enable patients to breathe more naturally through some of the most innovative breath delivery technology available.

ELECTRONIC BARTAR

ELECTRONIC BARTAR(PEC) CO. Was established in year 2001 as the manufacturer of anethesia mashine with ventilator and patient care monitoring system 12",15" &18.5" We enjoy the facilities of attending in Pardis Tech - Park as the best R&D center of high technology products. Electronic bartar (PEC) Co. is based on research and develop and manufacturing Anesthesia Machine, Ventilator, Syringe Pump and Patient Care Monitoring Systems. CE and ISO approval were obtained in 2005 in order to able the products to be exported and shared most of the local market.

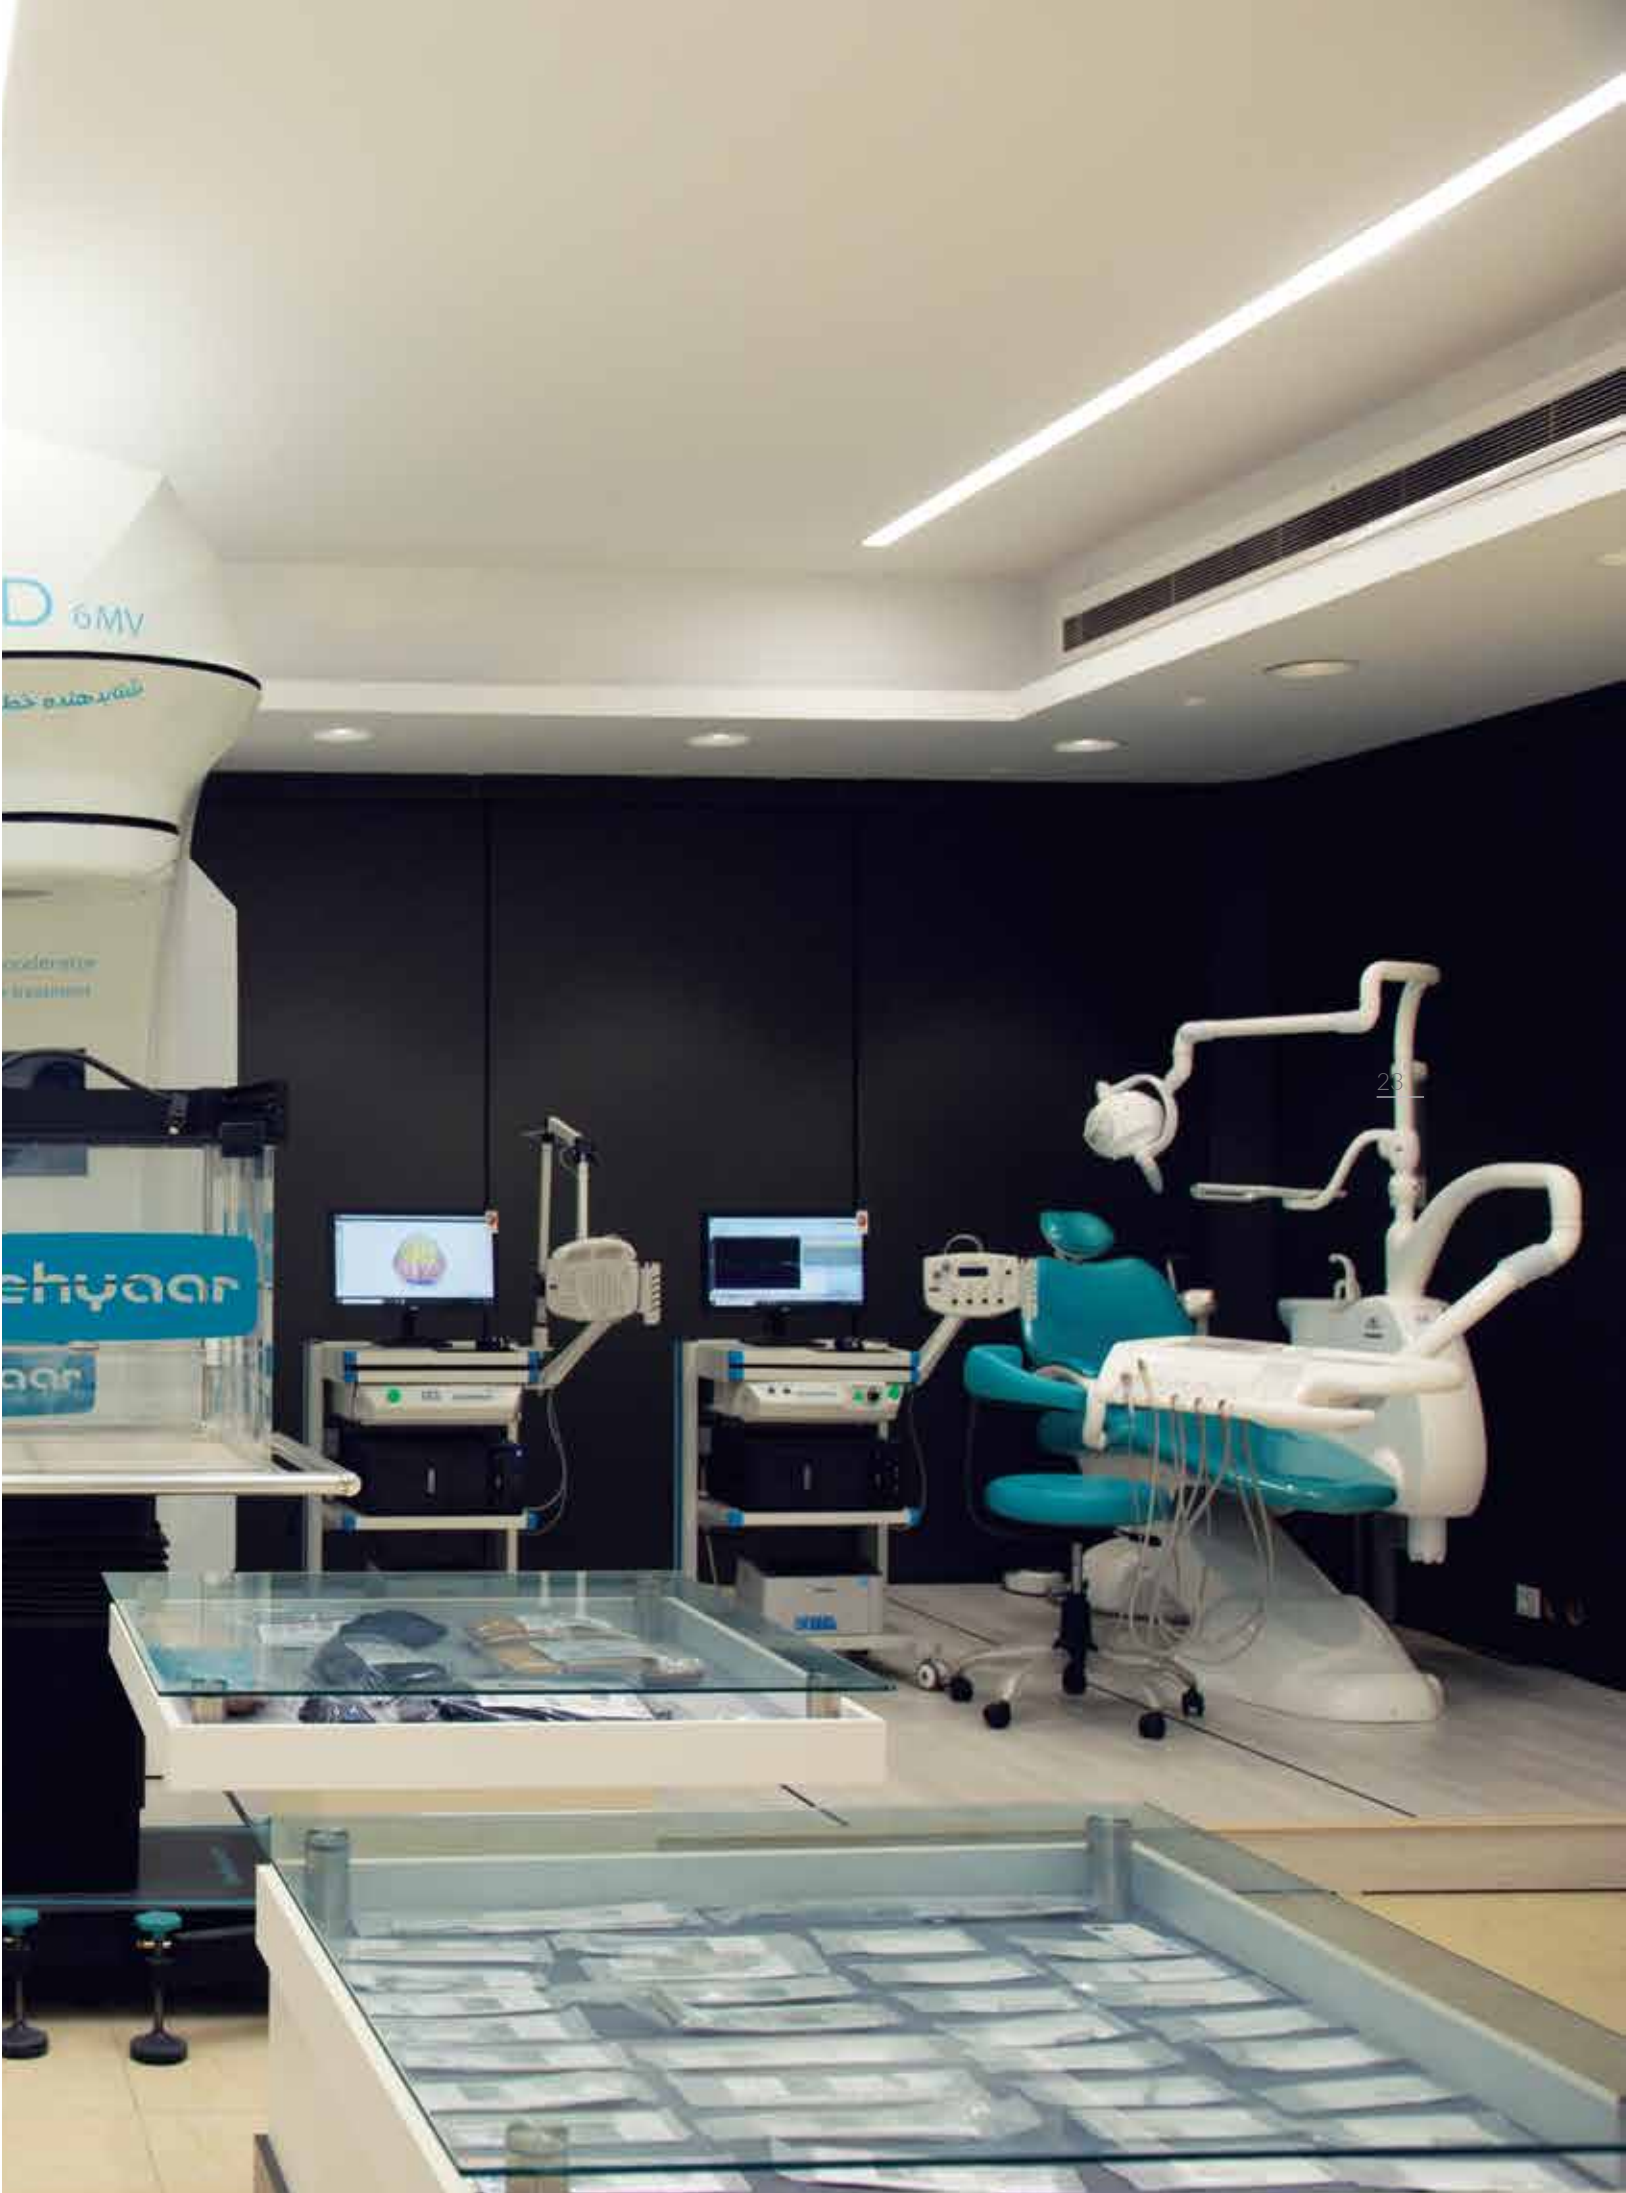

and Breath

ISOMEE

ONE STOP SHOP SOLUTION

ISOMEE active in medical events and have helped to create synergies in the production and export of medical equipment jointly.

An Efficient Solution for Hospitals

One of the achievements of the Syndicate is forming a Modular Operating Room Package (MORP). For the running this operating Room, all the medical standards and equipment used having the CE mark. This achievement, which was carried out with the participation of five major members of the ISOMEE, has had the high capacity to export ISOMEE engineering and technical services to the different countries. The progress of the members in this area is very impressive, and now the establishment of export bases is one of the big goals of the ISOMEE. "Establishing export bases in different countries, is one of the major goal."

ISOMEE manufacturers have the affordable technology and are able to make and deliver components in line with European standards, resulting in reasonable prices. Cardiovascular, Orthopedic Implants and etc ..., have scientific value added. In terms of medium and High Tech equipment, ISOMEE producers have many advantages to exporting. In this section, there is a great deal of scientific value added and technical knowledge equals its counterparts in developed countries and is quite competitive. However, the quality of R & D know-how in Iran is highly investment-intensive and creates a high added value.

In the first step, we introduced, design, build and equip one complete operating room in the uniform price package. The idea was so successful that it was now looking to design other medical treatments, including ICU and CCU, dialysis, and so on. All the standards required for the construction of the MORP are carried out by a partnership consisting of the five main companies of the ISOMEE.

Modular Operating Room Package (MORP)

27

is an outstanding solution for Hospitals to provide a comfortable and efficient environment for surgical operations. This package has been managed by Farsar Tejarat Eng. Co. Ltd. For running the package, Farsar Tejarat Eng. Co. Ltd is using other ISOMEE products as follows:

- Pooyandegan Rah Saadat CO. (Patient Care Monitoring System)
- Premier Electro medical Care CO. (Anesthetic Machine)
- Kavandish System CO. (Cautery Machine)
- Farafan Co. (Surgery Table)

The specification of MORP includes: Antibacterial Glass Wall Modular System, Ceiling Pendant, Surgical Tables, Surgical Cautery Machine, Monitor, Negatoscope, LED Surgical Light, Digital Clock for Operating Room and Anesthetic machine.

Advantages of using a modular operation room system

High installation and comfort in run.

- The ability to use sound insulation, heat and fire protection behind it. Impressive and expert design.
- Possibility to apply changes without.
- Demolition Lighting feature in the background.
- Being modular.
- Possibility to install all necessary.
- Equipment, such as screens, cabinets, ventilation system ducts and other hospital equipment
Easy to clean and resistant to any.
- Chemicals and hospital detergents.

KAVANDISH ELECTRO SURGICAL UNITS

Kavandish's success was attributed to observation international standard in quality assurance requirements and having a qualified team of scientific/technical staff. Our products: Various range of Electrosurgical Units (High quality, Economical, User-Friendly).

Used for open surgery, MIS (Minimally Invasive Surgery), Endoscopy,

ICONIC family meet all the needs of modern surgery, equipped with Vessel sealing system (ability of reliable large vessel sealing up to 7mm in diameter) and Argon plasma Coagulation (non-contact uniform and efficient coagulation with limited depth, resulting minimum perforation risk.)

KAVANDISH SYSTEM MEDICAL EQUIPMENTS

KAVANDISH SYSTEM is a well-known science-based company in the field of medical equipment with a wide range of the most up to date HF electro-surgical units.

KAVANDISH

29

established in 1995. Today, Kavandish is a well-known science-based company in the field of electronics in general and medical devices in particular with a wide range of the most up-to-date HF Electro-surgical Units (ESU) to meet all requirements of modern surgery and owns close to 70% of national market and focusing on growth of 20% export revenue.

Innovation, experience, enthusiasm, integrity, commitment, team spirit and professionalism are the key values which shape us as Kavandish System.

KARPAZIR

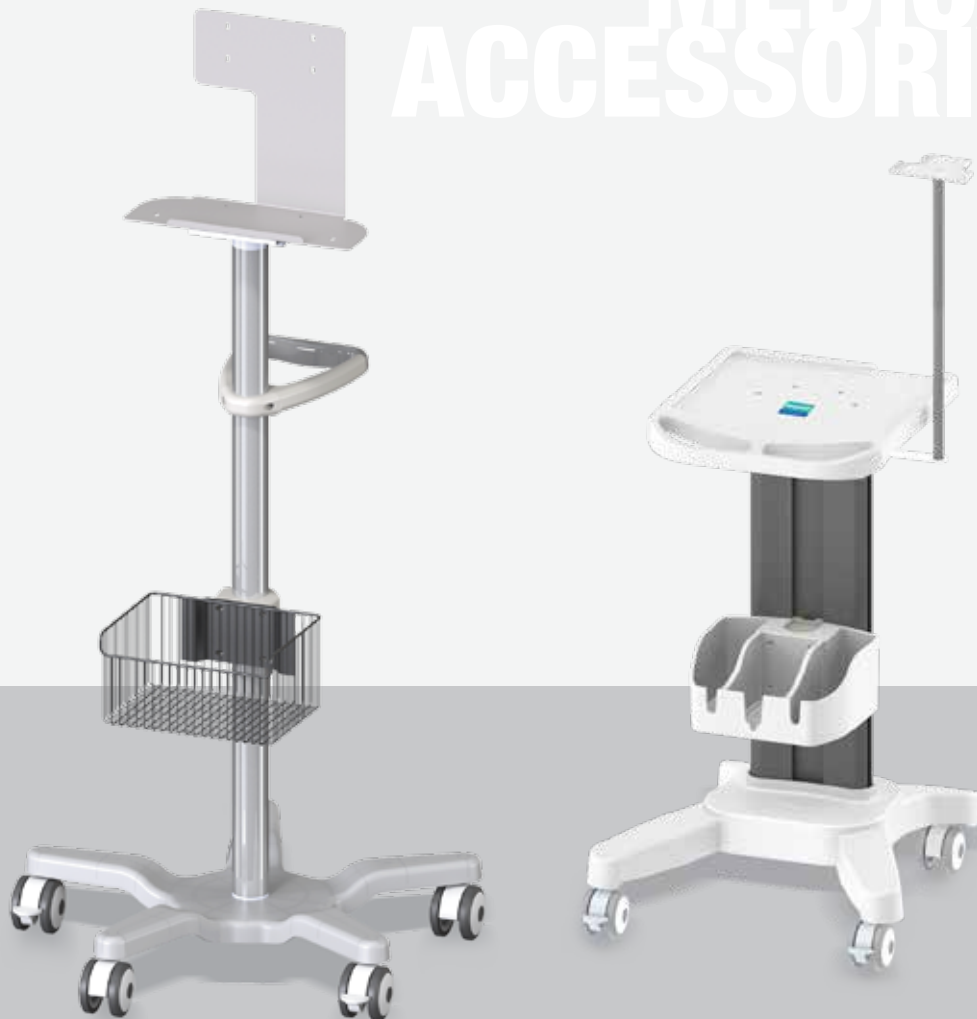

MEDICAL ACCESSORIES MANUFACTURER

MEDICAL ACCESSORIES

30

KARPAZIR MEDICAL ACCESSORIES

KARPAZIR established in 1993 as an designing and manufacturing medical accessories organization. Professionally managed by team of very experienced management and technical professionals. Maintains the highest level of ethics and integrity in its commitments and deliverables.

- . Indepth experience in all areas of operation Production
- . Has been maintaining long term association with customers
- . Adaptability to changing global economic and technical scenario
- . support medical equipment activists in Iran and Middle East countries

PISHTAZ TEB

ZAMAN DIAGNOSTICS

32

WHO WE ARE

PISHTAZ TEB ZAMAN DIAGNOSTICS, started its research, development and marketing activities in 1998, and rapidly grew to be an international brand specialized in "In-Vitro Diagnostics Medical Devices, Life Science, IVF and clinical research". Our range of products are supplied to our customers through a wide distribution channel all over Iran and in more than 25 countries around the globe. Committed to participate in the improvement of the wellbeing of the society and world's healthcare, the company has built a strong relationship amongst research, technology and market requirements. By implementing constant market studies and continuous R&D, Pishtaz Teb is devoted to fulfil customer requirements in the area of Medical and Laboratory equipment along with its dedication to the IVD market.

APADANA TABNAK SYSTEM

was founded in 2014 with the aim of linking modern devices and domestically manufactured diagnostic kits in the medical industry.

APADANA TABNAK SYSTEM

33

Ever since its foundation, the fields of activity of our company has developed into a variety of missions such as Research and Development, service providing and consultation, manufacturing and marketing on medical instruments for more improved performances etc.

Throughout our years of business, our main intention and objective has always been economically improving the expenditure justification for both patients and laboratories, which we have and are managing it by valuing and attending to diagnostic centers and fulfilling their requirements in different areas such as import procedures, marketing and so on.

In only less than 4 years of activity, we are proud to have been chosen as "The Selected Company" in the 16th Tehran Quality Improvement Congress.

Aptasys is determined to become the leading supplier of immunoassay products for closed system instruments by 2020.

AALIPAYAM

MedicalEngineering Co.

AALIPAYAM medical engineering co. was established in 1995 by a group of ophthalmologists and medical engineers with the purpose of designing and producing ophthalmic equipment PHACO VITRECTOMY MACHINES.

Designing and manufacturing the first sample of surgical equipment called "Vitrectomy" resulted in winning awards at the 10th International Kharazmi Festival. Manufacturing and presenting various products in ophthalmology field brought fame for AALIPAYAM Co. in a short time as the first and unique ophthalmology equipment producer in Iran and the Middle East.

MEDIA KAVOSH (MEDIKA)

In 2008, we set out to build a company decided to be industry leader

Media Kavosh (Medika) is an Iranian knowledge- based company and leader of infusion therapy systems, medical suctions, electro surgery units and inhalation therapy devices. Our trusted trademarks include Mediject, Mediflow, Medineb and Surgiseal. Media Kavosh (Medika) meets applicable regulatory requirements national wide and the countries where we sell our products. Media Kavosh operates in an ISO 13485 and ISO 9001 certified manufacturing facility.

60

In 2015, greatly expanded the portfolio to offering Design Service for world class medical devices.

Today, Media Kavosh is the first and only Medical Device Design service provider with a full complement of design, development, and manufacturing services national wide.

We successfully partner with innovative companies (both large and small) worldwide to create advanced products for a number of medical specialty areas. Medical device product definition, technical engineering and product development use our exclusive process. Prototype and volume production are delivered in an ISO 13485 certified facility.

With a dedicated team of medical device experts, Media Kavosh takes great pride in providing our customers with high quality, innovative solutions to meet the challenges of today's marketplace.

a.k.a. Med Fanavaran Plus

History MFP Co. [a.k.a. Med Fanavaran Plus]

is knowledge-based company was established in 2015 with the aim of producing advanced medical equipment in Iran. The trademark of our products is SIMUT and all of our ultrasound systems are marketed with this brand.

Achievements We invested in localizing the technology of ultrasound devices and our company has built a new plant aimed at producing high-tech medical equipment such as sonography and echocardiography systems.

MAAD ZIST FANAVAR BEYNOLMELAL INC.

Maad Zist Fanavar Beynolmelal Inc. . is a leading manufacturer of portable ventilator, Automated external defibrillator, COVID-19 antibody/antigen Rapid Test, and inflator, as well as Exclusive representative for a variety of high-tech products including stents (Cardiatis, Belgium), portable ventilators (Automedx, USA), automated external defibrillator (Cardia International, Denmark), orthopedic nails (Austofix, Australia) and acellular dermal matrix (Meccellis, France).

MAAD ZIST FANAVAR BEYNOLMELAL INC.

62

It is an established company in the marketing, sales and distribution of specialized medical equipment. It is the policy of the company to service the customer's needs and expectations by providing high quality products and efficient services.

For the successful achievement of the above goals, the company invests in the newest medical technologies. We place the highest priority on maintaining stringent quality standards, continuous development as well as comprehensive service for our customers.

NANO HESGAR SAZAN SALAMAT ARYA

NANO HESGAR SAZAN SALAMAT ARYA is Knowledge enterprise that has started working in the field of Designing and Manufacturing medical equipment and products with advanced technology in cancer diagnosis and treatment (including microfluidic chips, nano biosensors, graphene-based sensors, diagnostic probes, nanowires, and nanotubes).

NANO HESGAR

63

The company's primary goal is to develop and commercialize innovative, science-based products in medical equipment. A pioneer group of graduate and post-graduate students in various fields of study (including electrical engineering, chemical engineering, biology, polymer engineering) in partnerships with a leading group of breast cancer surgeons, oncologists, and pathologists are participating in achieving this goal.

NABZ HOOSHMAND SALAMAT COMPANY

64

Nabz Hooshmand Salamat Co. is active in the field of design, production and sale of medical equipment and modern health gadgets in the field of digital health. The main products of Nabz are digital Stethoscope and portable ECG. It should be noted that all products of Nabz Hooshmand Salamat Company have a manufacturing certification for the Iran General Directorate of Medical Equipment and the ISO13485 quality management system standard. Nabz products also have knowledge-based certificates and patents. The software platform of Nabz Hooshmand Salamat Company in the field of medical consultations and online health services has also been introduced to the market.

KTC Medical Co. Ltd.

was established in the year 1998 and is the leading manufacturer of Nurse calling and Emergency code call systems serving over 60000 beds in 600 hospitals in the MENA region.

KTC MEDICAL CO. LTD.

65

The applications for the KTC products used in Hospitals, Ambulatory Surgery Centers, Clinics, Long-Term care facilities, Physician Offices, Medical Assisted Living Centers, Nursing Homes and outpatient departments consist of Alarms and Communications and Workflow Optimization.

MERSATEB TAJHIZ COMPANY.

Mersateb Tajhiz Company has started working in medical community with the aim of providing high-technology, high-standards and advanced equipment in the field of skin, hair, beauty and women and has set its goals to increase the community health and to promote the beauty industry.

The company has manufactured devices like Plasma Firebolt, RF Fractional Nettle, Carboxytherapy Hurricane, RF vaginal Madam X with the help of its experienced experts. Mersateb Tajhiz has been able to achieve high quality in designing and manufacturing advanced medical devices and also professional after-sales services with implementing and obtaining quality and management standards.

KAVOSH MEGA MEDICAL MANAGEMENT

This production unit with the brand of Kavosh Mega Medical Instruments started its activity in 1984 in a small workshop, taking into account the needs of the society, the welfare of consumers and having big goals, in which it succeeded in producing hospital, clinical and medical equipment. And a laboratory such as autoclave in different volumes, four, incubator, chemical hood and laminar, etc....,

Kavosh Mega Medical Management, considering the grace of God, the presence and performance of managers and staff, paying attention to legal requirements, in order to implement its goals, has chosen a policy as a platform for micro and macro goals of the company: Appropriate attention to the development of software and software infrastructure facilities, taking into account financial capacity and production capacity Developing the market share of the company's products Implement a culture of continuous improvement Maintain the effectiveness of the company's efforts to obtain standard approval by maintaining product quality and compliance with legal requirements Move towards achieving customer demands and increasing their satisfaction Increasing the quality of products in order to compete with domestic and foreign competitors and the ability to be considered in the international arena.

SINA

We are a company that draws on a heritage of more than 50 years in the field of medical equipment since 1971.

Today, we attempt intensively to ensure our customers that we are well-positioned not only for using the newest technology, experienced staff, innovation and the art of creativity but also because of our products special features based on patients and caregiver's demands.
